

Corrigendum

Corrigendum to ‘Trends and Outcomes with Transcatheter versus Surgical Mitral Valve Repair in Patients >80 Years of Age’ [The American Journal of Cardiology 125 (2020) 1083-1087]

The authors regret to inform that the first sentence of results section mistakenly contained the word “repeat”. So the sentence should read as “Over a period of 5 years, 7415 patients underwent MVR with either surgical-MVR (n = 2,655, 36%) or TMVR (n = 4,760, 64%) in patients ≥80 years of age”.

Furthermore, the senior author Dr Tang reports disclosure of as a physi-

cian proctor and consultant for Medtronic, and is a consultant for Abbott Structural Heart and W. L. Gore & Associates.

The authors would like to apologise for any inconvenience caused.

Declaration of interests

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.
