

Corrigendum: Genetic Factors, Adherence to Healthy Lifestyle Behavior, and Risk of Invasive Breast Cancer Among Women in the UK Biobank

Corrigendum: Genetic Factors, Adherence to Healthy Lifestyle Behavior, and Risk of Invasive Breast Cancer Among Women in the UK Biobank by Rhonda S Arthur et al. *JNCI J Natl Cancer Inst* (2020), <https://doi.org/10.1093/jnci/djz241>

The scores for the highest and lowest categories for alcohol consumption and smoking in [Supplementary Table 1](#) were incorrectly published in the original publication. As indicated in the description of the HLI, under the eMethods section, the healthiest behavior category was given the highest score. Hence, for alcohol consumption, the correct scores are 1 for those who never consumed alcohol and 0 for those with alcohol consumption levels >14.0 g, while for smoking, the correct scores are 1 for never-smokers and 0 for current smokers.

The authors take responsibility for the errors.
