

Human PATHOLOGY

VOLUME 105

November 2020

ORIGINAL CONTRIBUTIONS

- 1** The potential utility of GATA binding protein 3 for diagnosis of malignant pleural mesotheliomas
Sarita Prabhakaran, Ashleigh Hocking, Chankyung Kim, Matthew Hussey, and Sonja Klebe
- 9** Details of human epidermal growth factor receptor 2 status in 454 cases of biliary tract cancer
Nobuyoshi Hiraoka, Hiroaki Nitta, Akihiro Ohba, Hiroshi Yoshida, Chigusa Morizane, Takuji Okusaka, Satoshi Nara, Minoru Esaki, Yoji Kishi, and Kazuaki Shimada
- 20** Comprehensive molecular genetic studies of Epstein-Barr virus-negative aggressive Natural killer-cell leukemia/lymphoma
Juehua Gao, Yanming Zhang, Nabeel R. Yaseen, Yuqiang Fang, Xinyan Lu, Madina Sukhanova, Qing Chen, and Yi-Hua Chen
- 31** c-MET immunohistochemistry for differentiating malignant mesothelioma from benign mesothelial proliferations
He Zhen Ren, Simon Cheung, and Andrew Churg
- 37** Unique clinicopathologic and genetic alteration features in early onset colorectal carcinoma compared with age-related colorectal carcinoma: a large cohort next generation sequence analysis
David Escobar, Ryan Jones, Juehua Gao, Leyu Sun, Jie Liao, and Guang-Yu Yang
- 47** Hepatocellular carcinomas can be Special AT-rich sequence-binding protein 2 positive: an important diagnostic pitfall
Whayoung Lee, Xiaodong Li, and Vishal S. Chandan
- 53** p53 immunostaining cannot be used to predict *TP53* mutations in gastric cancer: results from a large Central European cohort
Isabelle Schoop, Saffiyeh Saboor Maleki, Hans-Michael Behrens, Sandra Krüger, Jochen Haag, and Christoph Röcken

NOTICE TO CONTRIBUTORS

All manuscript submissions to HUMAN PATHOLOGY should be submitted electronically to <https://www.editorialmanager.com/yhupa/default.aspx>. Authors with circumstances that prevent online submission should send inquiries to the following address: David Newcombe, Managing Editor, HumanPathology@stellarmed.com.

Cover legend: "From the manuscript "Comprehensive molecular genetic studies of EBV-negative aggressive NK-cell leukemia/lymphoma" by Dr. Gao and colleagues, the bone marrow aspirate smear shows multilineage hematopoiesis and occasional large atypical cells with large, irregular nuclei (hemophagocytosis noted in the inset) in EBV-negative aggressive NK-cell leukemia/lymphoma."

(Contents continued)

- 67** Intestinal metaplasia around the gastroesophageal junction is frequently associated with antral reactive gastropathy: implications for carcinoma at the gastroesophageal junction
Monika Vyas, Romulo Celli, Manpreet Singh, Natalie Patel, Harry R. Aslanian, Daniel Boffa, Yanhong Deng, Maria M. Ciarleglio, Loren Laine, and Dhanpat Jain
- 74** A review of the main histopathological findings in coronavirus disease 2019
Walter O. Vasquez-Bonilla, Roberto Orozco, Víctor Argueta, Manuel Sierra, Lysien I. Zambrano, Fausto Muñoz-Lara, Dennis Salomón López-Molina, Kovy Arteaga-Livias, Zachary Grimes, Clare Bryce, Alberto Paniz-Mondolfi, and Alfonso J. Rodríguez-Morales
