

In the article by Chen et al. entitled “Sensitization to Furry Animals and Clinical Relevance of House Dust Mite-Induced Allergic Rhinitis in Guangzhou, China” (*Int Arch Allergy Immunol.* 2020;181:488–98, DOI: 10.1159/000506594), e1 is incorrectly described as dog and e2 as cat. The correct description should be e1 as cat and e2 as dog. However, this does neither affect the results nor the conclusions of the article.
