

## Erratum to “Changes in medial elbow elasticity and joint space gapping during maximal gripping: reliability and validity in evaluation of the medial elbow joint using ultrasound elastography” [J Shoulder Elbow Surg 2020;29:e245-e251]

In the above-mentioned paper, an error has been noted in the description of the measuring device name. In the Setup and protocol section, the original text reads: “We performed B-mode and elastography imaging using a 10 MHz annular-array ultrasound transducer.”

The correct text should read: “We performed B-mode and elastography imaging using a 5-18 MHz linear-array ultrasound transducer.”

The authors apologize for this error.
