

Jeff Choi, MD, MSc, is a general surgery resident at Stanford University. He graduated with a BS from Cornell University and an MD and MSc (Epidemiology and Clinical Research) from Stanford University. He is a candidate for a master's degree in biomedical informatics from Stanford University as the Neil and Claudia Doerhoff Surgeon Scholar and the KLS Martin-Chest Wall Injury Society Resident Research Fellow. His research interests are in trauma surgery.

Garrison Carlos, MD, is a general surgery resident at Stanford University. He graduated with a BS from Louisiana State University and an MD from University of South Alabama. His research interests are in trauma surgery, hepatobiliary surgery, and quality improvement.

Aussama K. Nassar, MD, FRCSC, is Clinical Assistant Professor of Surgery at Stanford University. He earned his MD from the University of Al-Mustansiriyah College of Medicine and a master's degree in health science education from McMaster University. He completed both general surgery residency and critical care fellowship training at McMaster University. He is the current program director of the surgical critical care fellowship at Stanford. His research interests include the development of assessment tools for trainees and burnout among physicians and other healthcare professionals.

Lisa M. Knowlton, MD, MPH, is Assistant Professor of Surgery at Stanford University. She earned her MD from McGill University and a Master of Public Health degree from Harvard University. She completed general residency at the University of British Columbia and critical care fellowship training at Stanford University. Her research interests are in addressing barriers in access to care and reducing disparities among vulnerable surgical populations, including underinsured trauma patients.

David A. Spain, MD, is the David L. Gregg, MD Professor and Chief of Acute Care Surgery at Stanford University. He earned his MD from Wayne State University, completed general surgery residency at Robert Wood Johnson University Hospital, and fellowship training at University of Louisville. He is the current President of the American Association for the Surgery of Trauma and a Council Member of the American Board of Surgery. His research focus is in assessment of clinical care, systems of care, and assessment of stress response and posttraumatic stress disorder after trauma.
