

**T. Peter Kingham, MD**, obtained his undergraduate degree at Yale University and his MD from SUNY Stony Brook. He completed general surgery residency at NYU and undertook a research fellowship in hepatic immunology at Memorial Sloan Kettering Cancer Center. After residency, he completed a fellowship in surgical oncology at Memorial Sloan Kettering Cancer Center prior to being appointed on the Hepatopancreatobiliary Service. His primary research interests are determining how to improve cancer care for patients in low- and middle-income countries and how to improve outcomes for patients with liver and pancreas cancers in the United States.

**Victoria Aveson, MD**, is a general surgery resident at New York Presbyterian Hospital-Weill Cornell Medical Center. She received her medical degree from the University of Pittsburgh School of Medicine. Her research interests include the microbiome and novel classification systems in hepatobiliary cancers.

**Alice C. Wei, MDCM, MSc**, is a hepatopancreatobiliary surgical oncologist and an Associate Attending Surgeon at Memorial Sloan Kettering Cancer Center. She is also the Co-director of Surgical Initiatives for the David M. Rubenstein Center for Pancreatic Cancer Research. Her research interests include clinical trials for hepatopancreatobiliary cancers and health services/health policy research focused on evaluating and improving surgical outcomes for patients with cancer.

**Jason A. Castellanos, MD, MS**, is a fellow in complex general surgical oncology and hepatopancreatobiliary surgery at Memorial Sloan Kettering Cancer Center. After graduation from Stanford University, he completed medical school and general surgery residency at Vanderbilt University. During his postdoctoral research fellowship, he obtained a master's degree in biomedical informatics. His academic interests include hepatopancreatobiliary malignancies and applying machine learning approaches to optimizing therapeutic selection.

**Peter Allen, MD**, is a graduate of Harvard University and Dartmouth Medical School. He currently serves as the Chief of Surgery at the Duke Cancer Institute, and the Chief of Surgical Oncology for the Duke Health System. His primary research interest is in cystic precursor lesions of pancreatic cancer and he currently leads the first multi-institutional trial aimed at preventing pancreatic cancer.

**Daniel P. Nussbaum, MD**, is currently a fellow in complex general surgical oncology at Memorial Sloan Kettering Cancer Center. He received his undergraduate degree from the University of Wisconsin- Madison, his medical degree from the University of Southern California, and completed his general surgery residency at Duke University. His clinical and translational research focuses on hepatopancreatobiliary malignancies.

**Yinin Hu, MD**, is Assistant Professor in the Division of Surgical Oncology at the University of Maryland. He attended Washington University in St. Louis School of Medicine. He completed general surgery residency at the University of Virginia and a surgical oncology fellowship at Memorial Sloan Kettering Cancer Center. His academic interests include comparative and cost-effectiveness research and patient-reported outcomes.

**Michael D'Angelica, MD**, received his medical degree from Tufts University and completed his general surgery residency at the University of Connecticut. During his residency, he completed a research fellowship at Memorial Sloan Kettering Cancer Center and after residency completed the surgical oncology fellowship at the same institution. Dr. D'Angelica currently holds the Enid A Haupt chair in surgery, serves as the Vice Chair of Education, and is a member and attending surgeon at Memorial Sloan Kettering Cancer Center. He is also a Professor of Surgery at Weill Medical College of Cornell University. Dr. D'Angelica is currently the program director for both the complex general surgical oncology fellowship as well as the hepatopancreatobiliary fellowship at Memorial Sloan Kettering.
