

Jordan Rook, MD, is a resident in general surgery at the David Geffen School of Medicine at the University of California, Los Angeles. He completed medical school at the Northwestern Feinberg School of Medicine. His clinical interests include colorectal surgery and surgical oncology. His previous academic research has focused on health policy in the United States and disparities in global surgical care. Looking forward, he aspires to conduct research and advocacy that addresses disparities in health care through public policy.

Jill Q. Dworsky, MD, MS, is a resident in general surgery at the David Geffen School of Medicine at the University of California, Los Angeles. She completed her undergraduate education at Stanford University and then went on to UCLA to complete her M.D. as well as master's degree in health policy and management. Her research interests include geriatric surgery and perioperative pain management.

Thomas Curran, MD, MPH, is Assistant Professor of Surgery at the Medical University of South Carolina (MUSC) in Charleston, South Carolina. He completed residency in general surgery at the Beth Israel Deaconess Medical Center in Boston and fellowship in colon and rectal surgery at the University of Minnesota before joining the faculty at MUSC. His research interests include quality improvement in diverticulitis and inflammatory bowel disease, particularly related to access to care.

Sudeep Banerjee, MD, MAS, is a resident in general surgery at the David Geffen School of Medicine at the University of California, Los Angeles. He completed medical school at UCLA and obtained a master's degree in clinical research at the University of California, San Diego. His research interests include translational oncology, personalized medicine, and health services research in colorectal and gastrointestinal malignancy.

Mary R. Kwaan, MD, MPH, is a Health Sciences Associate Clinical Professor of Surgery at the David Geffen School of Medicine at the University of California, Los Angeles. She completed residency in general surgery at the Brigham and Women's Hospital in Boston and fellowship in colon and rectal surgery at the University of Minnesota. Her research interests include complications after ileostomy and colostomy surgery, and use of large clinical and administrative datasets.
